

Environment

AmcoGiffen (Amalgamated Construction Ltd and Giffen Group Ltd) is a construction and engineering contractor providing a range of specialist engineering services to the UK rail, energy, environment and essential infrastructure sectors. The Company will endeavour to act as a responsible custodian of the Environment at all times and is committed to achieving a high standard of environmental and social sustainability performance throughout its operations.

Our Policy is to:

- Strive to ensure that all our activities meet all applicable statutory environmental legislation and other compliance obligations to which the organisation may subscribe. Where no statutory control exists, the Company will endeavour to set its own appropriate standards;
- Encourage the adoption of sound environmental practices by employees and sub-contractors through training and awareness;
- To set, implement and monitor challenging sustainability objectives and targets through the Company's SHEQ 24/7 Strategy in order to facilitate continual improvement within the organisation;
- To prevent pollution and to reduce, to a practicable minimum, the impact of our operations on the environment and local communities, through implementing and monitoring compliance with statutory regulations, Company operating procedures and Client standards;
- Commit to the Science Based Targets Initiative to facilitate an absolute carbon reduction programme within the Company;
- Take proactive measures to protect the environment and preserve fauna, flora and natural habitats through ecological surveys and the consideration of nature conservation issues within our design, tendering, planning and construction processes;
- Promote the efficient use of resources and raw materials and to procure timber which has been independently verified as legal and sustainable under the PEFC and FSC forest certification schemes;
- Engage with local communities and other interested parties, keeping those affected by our activities informed, and responding proactively to environmental issues that may arise;
- Ensure that environmental factors continue to be included in our decision making process and to maintain certification to ISO 14001.

Regularly review our operations to determine our environmental aspects, risks, opportunities and compliance obligations allowing the Company to continually improve our environmental management system and enhance our environmental performance.

This Policy will be reviewed by Company Directors for continued suitability. Copies of this Policy are available to Clients, regulatory authorities and members of the public.

John Booth
