

Staying COVID-19 Secure

AmcoGiffen (Amalgamated Construction Ltd and Giffen Group Ltd) recognises its obligations under current legislation and is fully committed to the provision of a safe and healthy environment for the wellbeing of all employees, workers, sub-contractors, visitors and the people in the communities where we work.

We have reviewed and will comply with any government / legal requirements where applicable, i.e. Public Health England (PHE), the Health and Safety Executive (HSE) and Construction Leadership Council (CLC) guidance on managing the risk of COVID-19. However, health and safety is everyone's responsibility and, in line with our organisational values, everyone must take personal responsibility to assess and manage the risks of COVID-19 as part of their role.

AmcoGiffen will:

- Follow the latest Government guidelines to help stop the spread of COVID-19;
- Conduct a COVID-19 Risk Assessment for each office and share the results with our workforce;
- Implement suitable control measures as identified within the COVID-19 Risk Assessment;
- Implement enhanced cleaning procedures, particularly high-contact areas such as door handles, printers and keyboards;
- Ensure handwashing and hygiene procedures are available and in line with current guidance;

Both Government and our guidance including the COVID-19 risk assessments will develop and change as the situation develops to ensure we will have the appropriate measures in place to make this as safe as possible. A generic COVID-19 risk assessment has been published on "Workspace", each office has a bespoke risk assessment that has been reviewed for compliance by the SHEQ team.
