

Environment

AmcoGiffen (Amalgamated Construction Ltd and Giffen Group Ltd) is a construction and engineering contractor providing a range of specialist engineering services to the UK rail, energy, environment and essential infrastructure sectors. The company will endeavour to act as a responsible custodian of the Environment at all times and is committed to achieving a high standard of environmental sustainability performance throughout its operations.

Our Policy is to:

- Ensure that all our activities meet all applicable statutory environmental legislation and other compliance obligations to which the organisation may subscribe.
- Ensure that we continuously evaluate our significant environmental risks in our decision-making processes, implement relevant controls and use these as part of our procedures to maintain certification to ISO 14001.
- Encourage the adoption of innovation and best practice by employees and supply chain partners through engagement, partnering training and awareness raising.
- To set, implement and monitor challenging sustainability objectives and targets through the company's SHEQ 24/7 strategy in order to drive continual improvement.
- To prevent pollution and to reduce the impact of our operations on the environment, through monitoring compliance with statutory regulations, company procedures and client standards.
- Deliver against our approved Science Based Targets by implementing an ambitious targeted and sustained carbon reduction programme across our operations.
- Work with our clients and specialist design partners to effectively assess the Whole Life impacts of Carbon in the schemes we engineer, finding sustainable solutions to reduce emissions throughout their life cycle.
- Continue to take proactive measures to preserve fauna, flora and natural habitats through specialist ecological surveys and strive to achieve Biodiversity Net Gain via our design, planning and construction processes.
- Implement a Circular Economy strategy that encompasses all our operations, with a strong focus on Design, to ensure we minimise resource use, repurpose surplus materials, reduce waste and ensure the infrastructure we engineer is ever resilient to a changing climate.
- Engage with local communities and other interested parties, keeping those affected by our activities informed, and responding proactively to environmental issues that may arise.
- Regularly review our operations to determine our environmental aspects, risks, opportunities and compliance obligations and set objectives and targets to continuously improve.

This Policy will be reviewed by company directors for continued suitability. Copies of this Policy are available to clients, regulatory authorities and members of the public.

John Booth
